

IN THE NEWS AMCT3 Program- Social Media

In response to the COVID-19 Pandemic, Army medical personnel embedded at Cooper University Hospital in Camden, New Jersey assist hospital personnel in the set-up of tent outside the entrance to the Emergency Department. The tent is being used as a staging area for the screening of COVID-19 patients.

Through Military-Civilian partnerships, the Army Military Civilian Trauma Team Training (AMCT3) Program places active duty Army trauma teams at Level 1 trauma centers across the U.S. to sustain proficiency in trauma care.

CPT Simon Sarkisian, an embedded Army ER physician assisting with the set-up of a tent for COVID-19 patients at Cooper University Hospital in Camden, New Jersey.

CPT. Hillary Battles (far left), Army ICU Trauma Nurse, MAJ. Corey Mossop, Army neurosurgeon. (center), and MAJ. Ryan Ransom (right), Army Nurse Anesthetist assist with the set-up of a tent for COVID-19 patients at Cooper University Hospital in Camden, New Jersey.
