

TIME TO OWN MHS GENESIS

OUR NEW EHR

#genesisofGENESIS

MHS GENESIS is in Full Effect

It's Been One Month Since MHS GENESIS Go-Live

We're making significant progress toward enabling and empowering our military health enterprise, whether our patients are on the battlefield or at home here in our facility.

Here is where we are, and where we're going on our MHS GENESIS journey:

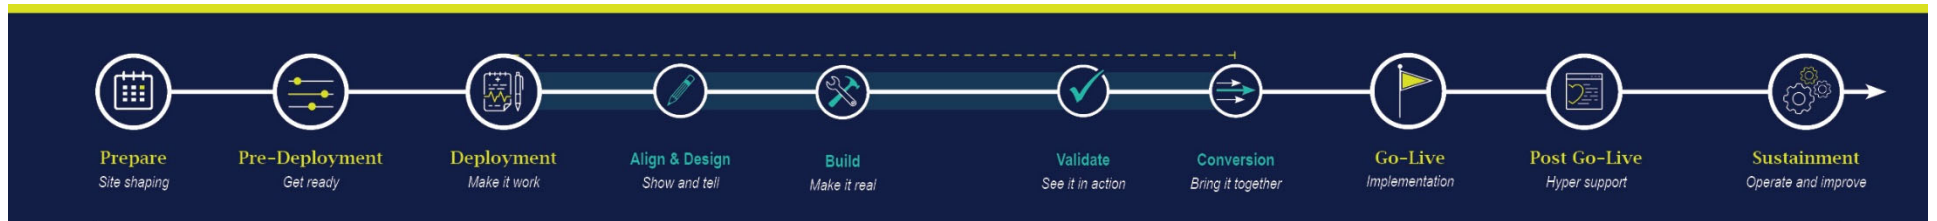

- We have begun to truly embrace the new electronic health record (EHR) into our daily routines
- Over time, we will all be MHS GENESIS experts
- Our long-time goal for you is that this new process becomes an afterthought and you will start to gain from the benefits of this transition
- Still reach out for support or questions to your peer experts

Implementation Timeline

Progress Made and What's Ahead

We're entering the **sustainment** phase of the MHS GENESIS implementation. During this phase, end users will move past understanding the system to having full confidence in their abilities to work in the system. Activities in these phases are designed for end users and patients to **own** MHS GENESIS.

What's Next

Here is where we are, and where we're going on our MHS GENESIS journey:

- The vendor is no longer at MTF
- Clinical communities and change agents are more involved
- More contact with solution owners, will be the main points-of-contact
- Tickets go through the Defense Health Agency (DHA) remedy tickets
- You've been given resources to succeed, but let us know what more you need
